

TECHNICAL SHEET

Retail fish table to avoid flies, parasites and insects

Advantages of a sales table

It is metallic, in the form of a cage, and allows the fish to be protected from bugs. Preservation methods aim to limit post-capture losses by preserving products and their nutritional and organoleptic values (Ali bdou, 2014). They allow availability to meet the increasing demand for fish (Ali Abdou, 2014).

This equipment is effective in terms of maintaining the quality of fish and has the advantage of being easy to handle and move around.

Description of the sales table

Figure 1 : different parts of a fish sales table

Features of the technology

- 30% increase in revenue
- Eliminates fly, pest and insect infestation
- Can reduce post-harvest losses by 20%.
